CAREER OBJECTIVE

I am looking to be part of a renowned company where I can continue my professional and personal development. My goal is to bring value through my strong knowledge and experience in programming, both in mobile and web side. I am committed to working as a team with ethical values and responsibility, constantly seeking to improve my skills and contribute to the success of the company.

EXPERIENCE

Borderless AI   **Mexico City- Mexico**
Software Engineer - Mobile & Web Development   August 2023 - April 2024

- Writing code on mobile, frontend, and backend, ensuring the quality, in accordance with the system architecture.
- Code review on Merge Requests according to best practices.
- Introduced unit tests and widget tests, as well as automated tests execution for mobile in the Gitlab CI pipeline.
- Integration analytics with Mixpanel, and logs with DataDog to analyze user interaction on the platform and diagnose the root cause of errors more effectively.
- Collaborating with other mobile engineering members in Mexico and Canada to develop the best Employer of Record app in the market, with a focus on customer satisfaction and fast delivery.
- Analyzing and implementing requirements in collaboration with multidisciplinary teams (Software Engineers, Product Managers, and Designers) from the United States, Canada, Mexico, and Guatemala to find effective solutions to problems.
- Participating in prioritizing roadmap functionalities based on business needs during planning sessions, in order to achieve the best product-market fit.
- Actively participating in Scrum ceremonies to ensure the successful delivery of mobile tasks.
- **Tech Stack -** Flutter, Firebase, React, Typescript, VS Code, Gitlab CI/CD, Datadog, Mixpanel.

Gtec Software   **Mexico City - Mexico**
Mobile App Developer - Mobile & Web Development   2021 - 2023

- Coordination of the small Frontend team for the "Ganado Bravo" project with the purpose of developing the best private livestock management system in Mexico and Spain for Grupo BAL.
- Development and implementation of new functionalities for three relevant projects for the company, such as Soy Cliente by GNP, Tekae by Tekae SA De CV, and Ganado Bravo by Grupo BAL.
- Maintenance and refactoring of code to mitigate bugs and ensure application scalability.
- Active and assertive participation in mobile ticket assignments.
- Offering solution proposals to complex client problems.
